Season 2026/2027 Price List

MADE IN BRITAIN

11/26 v2 UK

Introduction to Robinsons

For over 75 years, amateur and professional growers alike have recognised Robinsons as being at the very forefront of the greenhouse world. Renowned for their strength, precision engineering and practical features, Robinsons greenhouses are still the benchmark against which other greenhouses are measured. If you want the best in your garden, then keep reading!

History

Started in 1947, the company has moved around over the years including spells at Winchester, Southampton and Southam. Now based in Staffordshire, a nice central location for nationwide distribution.

Still made in Britain today

All Robinsons greenhouses are made in our factory in Staffordshire. The aluminium raw material is also extruded in the UK.

MADE IN BRITAIN

Rosette model shown in Taupe

Here's why it's worth investing in a Robinsons Classic

Cast alumninum ridge end caps.

Optional Victorian cresting.

Strong box section glazing bars eliminating the need for messy braces.

5'6 High eaves.

Double spring heavy-duty Thermofor auto openers.

Four nylon wheels on each door for smooth opening.

Screwed in capping system giving strength and a neat finish.

Optional integral 3 slat shelf.

Optional integral staging can be set to the perfect height.

36mm diameter black downpipes.

4mm toughened glass throughout.

Wide double doors (not all models).

Locking door catch.

Low level threshold for easy access.

High quality lovure vents.

Robinsons design features

Perfect ventilation as standard

Ventilation really is vital in your greenhouse and that's why all Robinsons greenhouses come complete with a generous allocation of roof vents, all fitted with NEW double spring heavy-duty Thermofor auto openers. These clever devices work on heat expansion alone and simply open the roof vents as the greenhouse warms up in the sun. You can also fit optional auto-louvre openers to your louvre side vents if you wish to be fully automatic.

Louvre side vents included

Louvre side vents are also included on virtually every Robinsons greenhouse. Whilst the automatic roof vents will draw hot air out of the top of the green-house, the louvres will draw the cool fresh air in to replace it. It is this combination which makes the Robinsons ventilation system so effective.

High Eaves

At 5'6" high at the eaves, Robinsons are as much as 18" higher than some greenhouses. The extra height is vital for your own head room, but also for tall plants such as tomatoes and chrysanthemums. The height also gives you plenty of room for a high level shelf, and makes the air inside the greenhouse more stable and less susceptible to sudden temperature changes.

Easy-Glide locking doors with no step

Robinsons doors are very strong with the glass securely held in with full length strips and they slide beautifully using nylon door wheels. The low-level threshold means that you have no big step to trip over when entering the greenhouse and it allows easy access for wheelbarrows and wheelchairs. All the models that are big enough have double doors for nice wide access.

Universal fittings channel

The standard channel in the glazing bars means that you can easily buy extra useful fixings such as shading or insulation clips, L-shaped brackets, extra shelves etc.

Extend or move your greenhouse later

If you need to move your greenhouse or even extend it (in 6ft or 8ft modules) later then that can be done – giving you future flexibility. It is also worth noting that you can extend your greenhouse to any length - without partitions, due to the excellent strength of the specially designed A-frames which go on the extension joints.

Internal partitions - create two climates

Ideal for sectioning off a smaller propagation area or area for heating in the winter. These are available on the 8ft, 10ft, 12ft and 14ft models and come complete with sliding door or doors. A partition also adds considerable strength to your greenhouse.

Practical staging & shelving

Robinsons aluminium slatted staging and shelving is unusual in that it is fitted to the greenhouse rather than free standing. The advantage of this is flexible height positioning, no vertical legs so you can put bulky or heavy items such as compost or planters underneath on the floor. This also makes it wheelchair friendly. The high level shelf is also unusual in that you can get a shelf along the whole length of the greenhouse – not always possible on all aluminium greenhouses.

Low (Dwarf) Wall Adaptions

We can adapt models to sit on a standard height low wall, roughly 2ft high. Please specify 'low wall model' and we will send you an acurate brick plan with your order confirmation. There is no extra charge for low wall models.

Robinsons special adaptions

There are a number of relatively easy modifications that can be made to a Robinsons greenhouse which will help you if you are needing a slightly more bespoke greenhouse:

R-Type

This is where we remove the rear gable end of your greenhouse so that it can join onto an exisiting wall or building.

V-Type

A modification that allows for one side of your greenhouse to be removed and replaced with a valley gutter assembly so that it can join onto an existing wall. Victorian style brackets are also supplied to support the valley gutter inside the greenhouse. A special dimensions drawing will be provided by us for this type of modification.

Z-Type

This modification allows you to specify the height of the wall you want a full height greenhouse to sit on. i.e. 5'6" eaves height - plus your wall. We then modify the door(s) to drop it down to ground level.

* The Renaissance Greenhouse Price includes tanalised timber top staging all around and two high level shelves.

Special adaptations

R-Type – The greenhouse should be reduced by deducting **£50** per foot of the width.
Z-Type - **£300** per doorway.
V-Type - No additional cost

Delivery costs

Mainland UK free delivery, except post codes - AB, DD, IV, KW, EH, TR + **£100** & BT + **£250**. For offshore, we can crate the glass and pack for onward shipment for **£250**. Any shortages can only be sent to a mainland address. Accessories ordered alone will attract a carriage charge (of **£6.95**).
