Introduction to Robinsons

For over 75 years, amateur and professional growers alike have recognised Robinsons as being at the very forefront of the greenhouse world. Renowned for their strength, precision engineering and practical features, Robinsons greenhouses are still the benchmark against which other greenhouses are measured. If you want the best in your garden, then keep reading!

History

Started in 1947, the company has moved around over the years including spells at Winchester, Southampton and Southam. Now based in Staffordshire, a nice central location for nationwide distribution.

Still made in Britain today

All Robinsons greenhouses are made in our factory in Staffordshire. The aluminium raw material is also extruded in the UK.

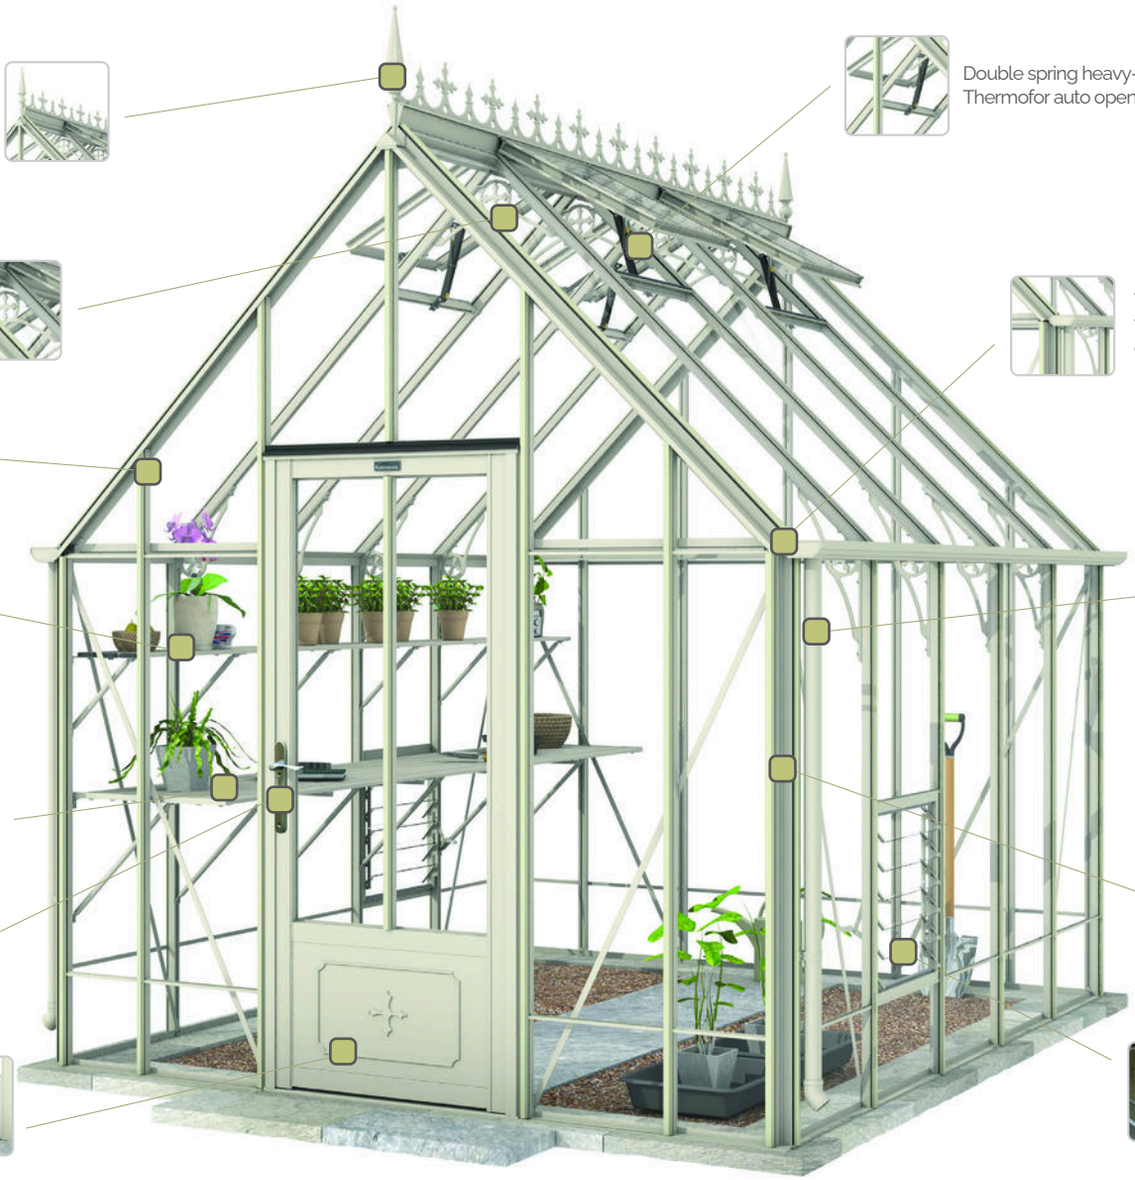
Here's why it's worth investing in a Robinsons Victorian



Optional Victorian cresting & finials

Cast aluminium spandrels in ridge and eaves

45 degree pitch

Optional integral 3 slat shelf

Optional integral staging can be set to the perfect height.

Lockable chrome handles

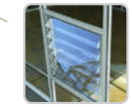
Embossed lower panel hinged door

Double spring heavy- duty Thermofor auto openers.

Victorian styled extra wide aluminium guttering and stop ends.

50mm powder coated aluminium downpipes with cast aluminium shoes.

Attention to detail for a better finish



High quality louvre vents

Special adaptations

There are a number of relatively easy modifications that can be made to a Robinsons Victorian greenhouse which will help you if you are needing a slightly more bespoke greenhouse:

R-Type modification

Removes the rear gable end of your greenhouse so that it can join onto an existing wall or building. This allows you to create an Edwardian style Lean-to. The price of an R-Type is reduced depending on the width of the greenhouse. Speak to your local expert for details.

Z-Type modification

With this modification you are able to specify the height of the wall you want the full height greenhouse to sit on i.e. 5'6" eaves height - plus your wall. This gives you the opportunity to fit the greenhouse over an existing doorway for instance.

The brick wall must be built to an official special base plan provided by us.

The most common heights customers choose are 150mm, 300mm, 450mm and 600mm as a course of bricks is usually 75mm. We then modify the door end of the greenhouse so that the door drops down to ground level and adjust the glass above the door.

V-Type modification

This modification is becoming increasingly popular as it allows for one side of your Victorian greenhouse to be removed and a valley gutter assembly is attached so that it can join onto an existing wall. Victorian style brackets are also supplied to support the valley gutter inside the greenhouse.

Valley gutter assembly interior with supporting Victorian style brackets.

V-Type modification

These modifications can easily be made in the factory, but there are no special instructions written, so its usually best to engage an experienced Robinsons greenhouse fitter to do these jobs. Please discuss this with your local expert.
