welcome lo

the malvern collection

HANDMADE IN WORCESTERSHIRE FOR OVER 50 YEARS

In the early 1970s, we started to design and produce garden buildings at our factory in Worcestershire. All of our buildings are made to order and handcrafted using traditional carpentry techniques by skilled craftsmen, which are then delivered and installed by our own teams of experienced fitters across the country.

The Malvern Collection design and make a wide collection of buildings, from the humble shed right through to fully lined, insulated and double glazed garden rooms and offices designed for all year round use.

We offer a wide selection of optional extras which enable you to create your ideal garden room to meet not only your practical needs but also your own personal taste.

Our paint spraying shop is one of the most advanced spraying and drying facilities in the garden building industry, where buildings can be coated with a highly durable and weather resistant, low maintenance paint and primer system, which will protect and enhance your building.

At Malvern, we use only the highest quality materials from sustainable sources. Our redwood buildings are constructed using kiln dried slow grown pine from Sweden's Northern sawmills and our cedar buildings are constructed using Canadian Western Red kiln dried cedar.

We strongly recommend that you visit one of our display sites where you can examine for yourself the quality, design and materials used in the manufacture of our buildings. Experienced staff will be on hand to discuss your individual requirements.

- · 13mm redwood cladding
- Heavy duty framework throughout
- · All ridge heights under 2.5m
- · Single door
- · Black ironmongery
- · Opening window(s) (quantity dependant on size and model)
- Framed ledged and braced door
- · Lockable rimlock and handle door catch
- · 3 door hinges per door for extra strength
- · Turn button top and bottom of door
- Tongue and groove timber roof and floor
- · Polyester mineral felt available in green, black or red
- · High quality timber treatment applied throughout prior to delivery
- A wide range of sizes to choose from

Options

- · Toughened glass
- · Double doors on 8' wide models
- Additional fixed and opening windows
- Workbenches and shelves
- A set of pressure treated floor bearers

- · Front height under 2.5m
- · Heavy duty framework throughout
- · Additional diagonal framework for extra rigidity and strength
- Heavy duty floor
- · Pressure treated floor joists
- · Tongue & groove timber roof and floor
- · Polyester mineral felt available in green, black or red
- · Fully framed, ledged and braced single door
- 3 lever mortice lock
- 3 heavy duty hinges per door
- · Single glazed 4mm toughened glass
- · Black or chrome ironmongery please specify at time of order
- 0.23m (9") roof overhang to front
- Joinery made fixed and lockable opening windows
- High quality timber treatment applied throughout prior to delivery (excluding pressure treated)
- A wide range of sizes to choose from

Options

A choice of Heavy Duty Redwood, Heavy Duty Pressure Treated, Heavy

- Duty Redwood Barnstyle, Heavy Duty Pressure Treated Barnstyle or Western Red Cedar cladding
- · Coloured painted finish wide selection of colours
- EPDM rubber roof
- · Tongue and groove lining plus insulation
- Internal partition wall
- High level security fixed windows in lieu of opening at no additional cost
- · Georgian style windows
- · Double glazing (excluding Georgian)
- · Integral Tidystore conversion
- · Integral open sided area
- · Composite decking upgrade to open area
- Hook and band hinges
- Security pack including 6 pin lock and security screws
- · Guttering and downpipe in a choice of three colours
- Heavy duty workbenches and shelves
- · Double door upgrade
- · A set of pressure treated floor bearers

Glossary of Terms

Coloured Painted Finish

A comprehensive paint system is applied prior to the building leaving the factory. The paint system comprises of an initial undercoat and a further top coat of your chosen colour.

Higher Pitched Roof

For those that require extra internal height.

Tongue & Groove lining and insulation

Building is internally lined with foil back bubble insulation and covered with redwood tongue and groove matchboard.

Bitumen Felt Tiles

Roof is covered with tile effect heavy duty felt tiles.

Slatted Roof

An aesthetic roof made with featheredged pressure treated redwood or Western Red cedar boards to enhance the appearance of your building and provide added protection to the roofing felt beneath.

Cedar Shingle Roof

Western Red cedar shingles fixed to pressure treated joists to enhance the appearance of your building and provide added protection to the roofing felt beneath.

EPDM Rubber Roof

A maintenance free synthetic rubber membrane covering the roof as an alternative to roofing felt.

Slate Effect Roof Tile

Slate effect roof tile is a synthetic roof tile which emulates the appearance of natural slates and has a long life span with no maintenance.

| Tongue and Groove Lining | 12mm |
| Skirting | 12mm |

Guttering

Guttering is available in a choice of three colours.

Integral Open Sided Area

Malvern Sheds (excluding Corner) can be divided into rooms with an open space decking area. Timber decking is used for this open area, with composite decking available as an upgrade.

Composite Decking

A high density, heavy duty and weather resistant wood composite.

Heavy Duty Floor Upgrade

As standard the floor is 13mm Redwood floor boards, the heavy duty floor upgrade is a 19mm Redwood unless your building is pressure treated cladding and then it is 19mm Pressure Treated Redwood.

Black or chrome ironmongery

Substitute ironmongery for either black or chrome to suit your requirements.

A set of Floor Bearers

Floor Bearers are 45 x 45mm (2" x 2") pressure treated lengths of timber which run in an opposite direction to the floor joists making a crisscross formation, allowing air circulation and ventilation to your garden building, taking away direct contact from the base and helps prevent damp from attacking the timbers.

| Heavy Duty Floor | 19mm |
| Pressure Treated Joists | 45mm |

All of our Sheds, Workshops, Potting Sheds and Cedar Greenhouses come with a guarantee against rot and decay. Twelve years for cedar, eight years for pressure treated and redwood.

All other workmanship and materials are guaranteed to be free from defects and faulty installation for a period of 12 months. All of our guarantees are subject to the buildings being maintained in line with our recommendations.

Our recommendations are that all timber garden structures require ongoing maintenance following installation. Cedar, redwood & pressure treated redwood require annual timber treatment to be applied, ideally prior to the colder wetter months for added protection. We recommend all spray painted buildings are maintained on an annual basis, inspect the painted areas on the building, checking for any areas where the paint finish maybe starting to deteriorate over time, peeling or flaking and repaint where necessary. A full guide of maintenance guidelines are available on request.

All base work is the responsibility of the customer, as is the safe securing of the building once installed, excluding cedar victorian. We require a level solid base, either paving slabs, decking or concrete upon which to install your building. In the event of a base failure, it is the customers responsibility to accept delivery of the building, safely and store appropriately.

Please allow as much room as possible around the building for our fitters to work during installation, a minimum of 450mm. If this is not possible please contact the office to discuss.

Our installers will need clear access to carry building sections from the vehicle to your prepared base, with no height restrictions or tight, sharp corners to negotiate.

Our installers cannot lift sections over 1.22m in height or over buildings such as garages. If the only access is through the house, a straight run is required and many sections will not pass through doorways. Please advise us in advance if there are any difficulties regarding access.

Always make allowance for any roof overhang when buildings have to go into confined spaces.

All redwood and cedar sheds have redwood roofs and floors. Cedar buildings have cedar windows, doors and external cladding only i.e. they have redwood framing, floors, roofs and open areas. All pressure treated sheds are pressure treated throughout.

Bewdley ironmongery is black. Malvern ironmongery is black or chrome as standard and this must be specified on order. Victorian Greenhouse ironmongery is brass or chrome but must be specified at time of ordering.

All building dimensions shown in this brochure are approximate, based on floor sizes.

All timber used in the construction of our buildings originates from sustainable forests.

As it is our policy to continually improve products, methods and materials, we reserve the right to change specifications from time to time, we will not make any significant variations without your agreement.

All images and descriptions are for illustration purposes only and are not always standard specification.

All building sizes are approximate and for guidelines only. All timber measurements, if stated, are finished sizes only i.e. after machining. Please note that finished sizes can vary by plus or minus 1mm.

We strongly advise that you visit one of our showrooms to view the range of buildings and finishes.
